1. Executive summary

Emilia Token (EMI) is a utility SPL token deployed on **Solana mainnet**, designed to integrate progressively within the **Emilia** commercial ecosystem: marketplace, dropshipping, distributor network, and commissions.

Token data

- **Name:** Emilia
- **Symbol:** EMI
- **Network:** Solana Mainnet
- **Standard:** SPL (Metaplex)
- **Decimals:** 9
- **Total supply:** 1,000,000,000 EMI

Mint address

4Ph9VpN6fbRcPVwvEbD1MPtwxzE4AJoSmwhfJM8sVWEV

Verifiable on Solscan and Solana explorers.

> EMI is a **utility digital asset**. It is not a share, debt instrument, or promise of profitability. Its future value depends on ecosystem adoption, available liquidity, and market conditions.

The project publishes tokenomics, official wallets, and presale status transparently. 100% of the supply is allocated across presale, DEX liquidity, team, marketing, and reserve.

2. Introduction: EMI and Emilia

Two complementary systems: Emilia is the business; EMI is its digital utility component.

EMI Token

- Standard SPL token on Solana.
- Fixed maximum supply: 1,000,000,000 EMI.
- Designed for use within the Emilia ecosystem.
- Not a share or debt instrument.

Emilia (commercial ecosystem)

- Marketplace for products from multiple manufacturers.
- Dropshipping and distributed inventory model.
- Distributor and affiliate network with sales commissions.
- MLM model: commissions from referral network sales.
- Progressive expansion into new markets.

Value flow

More commercial activity in Emilia → more sales → more commissions → greater need for efficient reward mechanisms → greater potential utility for EMI.

EMI and Emilia's commercial program are distinct systems. Commissions depend on commercial rules and real sales that generate commission rights.

3. Token utility

EMI is designed for different ecosystem functions when they are enabled.

1. Sales commission payments

Emilia distributors may receive sales commissions in EMI when this feature is enabled.

Sale → Commission → EMI

2. Referral commissions

The MLM model allows commissions from network sales. EMI may be used to pay these commissions.

Does not constitute a promise of profitability or guaranteed income.

3. Ecosystem utility

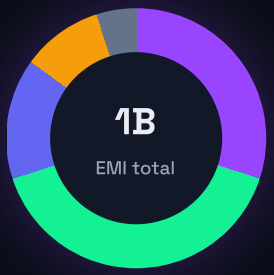

Planned future features:

- Reward payments within the ecosystem.
- Distributor incentives.
- Loyalty programs.
- Benefits and discounts when Emilia enables them.
- Future integrations with ecosystem services.

Important note: These features are planned and subject to technical implementation, liquidity, regulation, and system availability. We do not claim they already exist if they have not been developed yet.

4. Tokenomics and distribution

Total distribution of 1,000,000,000 EMI — 100% of supply allocated.

- **Presale** — 30% · 300M EMI
- **DEX Liquidity** — 40% · 400M EMI
- **Emilia Team** — 15% · 150M EMI
- **Marketing** — 10% · 100M EMI
- **Reserve** — 5% · 50M EMI

ALLOCATION	PERCENTAGE	AMOUNT	PURPOSE
Presale	30%	300,000,000 EMI	Staged sale to presale participants
DEX Liquidity	40%	400,000,000 EMI	Reserve for future decentralized exchange liquidity
Emilia Team	15%	150,000,000 EMI	Development team allocation
Marketing	10%	100,000,000 EMI	Campaigns, community, and growth
Reserve	5%	50,000,000 EMI	Strategic project reserve

The burn wallet is not an additional supply allocation; it is only used for tokens effectively sent to burn. Treasury receives SOL from the presale and is not part of EMI distribution.

5. Presale and price ladder

Staged presale with progressive pricing. Fundraising target: up to USD 10,000,000.

Presale parameters

- **Allocation:** 300,000,000 EMI (30%)
- **Starting price:** USD 0.005 / EMI
- **Final price (level 33):** USD 0.1056 / EMI
- **Increment:** +10% per block
- **Block size:** 9,090,910 EMI
- **Total levels:** 33
- **Minimum purchase:** 0.05 SOL
- **Maximum purchase:** 100 SOL per transaction

Purchase process

1. Connect Phantom wallet at emiliatoken.com
2. Choose SOL amount to send
3. Confirm transfer to Treasury
4. Receive EMI in buyer wallet

SOL goes to Treasury wallet. EMI is distributed from Presale EMI wallet.

Price ladder (selected levels)

LEVEL	EMI SOLD (UP TO)	USD PRICE / EMI
1	9,090,910	$0.0050
5	45,454,550	$0.0073
10	90,909,100	$0.0118
15	136,363,650	$0.0190
20	181,818,200	$0.0306
25	227,272,750	$0.0492
30	272,727,300	$0.0793
33	300,000,000	$0.1056

Price disclaimer: Presale price does not guarantee future market price. There is currently no active DEX pool for EMI.

6. Official wallets

Public addresses verifiable on-chain. Viewable on Solscan.

WALLET	ALLOCATION	ADDRESS (SOLANA)
Presale EMI	300M EMI	3UCRwG9L9PsrETAGtYJ7J121b7hAnVVw8DMMceNuc1bQ

EMI Mint: 4Ph9VpN6fbRcPVwvEbD1MPtwxzE4AJoSmwhfJM8sVWEV

7. DEX liquidity

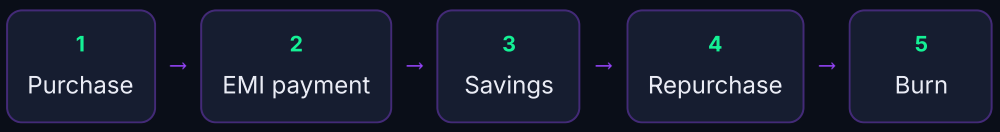

40% of supply (400M EMI) is allocated to the official DEX liquidity wallet.

> The 400M EMI are in the verifiable on-chain wallet. **There is currently no active DEX pool** for EMI. Allocation does not imply an active secondary market today.

8. Burn mechanism (proposed)

Proposed design to connect Emilia ecosystem activity with EMI tokenomics. **Subject to final implementation.**

When eligible purchases are paid with EMI, Emilia may avoid fiat processing costs. A fraction of eligible net savings may be used to repurchase EMI and permanently remove them from circulation in a verifiable way.

Planned mechanism, subject to change. Actual burns depend on eligible transactions, costs, liquidity, and operational conditions. Does not guarantee token appreciation.

9. Roadmap

PHASE 1 — FOUNDATION

Completed

- EMI Token design and tokenomics.
- Token creation on Solana (Metaplex).
- Official website and technical documentation.
- Initial utility definition and security infrastructure.

PHASE 2 — PRESALE AND COMMUNITY

In progress

- Staged presale with progressive pricing.
- Documentation publication (including this White Paper).
- Community development and on-chain transparency.

PHASE 3 — EMILIA INTEGRATION

Planned

- Wallet and EMI balance integration on the platform.
- Commission and referral system with EMI.
- Transparent rewards dashboard.

PHASE 4 — UTILITY AND EXPANSION

Planned

- Rewards, loyalty, and incentive programs.
- International expansion and scalability.

PHASE 5 — ECOSYSTEM

Long-term vision

- EMI + Emilia + Distributors + Customers + Referral network.
- Real utility linked to Emilia's economic activity.

10. Security and transparency

- **Transparent tokenomics** — supply and distribution verifiable on-chain.
- **Audits** — security reviews when applicable.
- **Wallet protection** — custody best practices.
- **Public documentation** — information and periodic updates.

11. Risks and legal disclaimer

- Buying EMI during the presale involves risk of partial or total loss.
- Presale price does not guarantee future market price.
- EMI is a volatile digital asset, not a safe investment.
- Future utility depends on Emilia ecosystem development and adoption.
- This document is informational and does not constitute financial advice or a securities offering.

12. Frequently asked questions

What am I buying?

EMI, the utility token of the Emilia ecosystem on Solana. It is not a share or debt instrument.

Is there currently an active DEX pool?

No. There is currently no active DEX pool for EMI.

What is the total supply?

1,000,000,000 EMI.

Is it a safe investment?

No. Cryptocurrencies are volatile and carry risk of partial or total loss.
